DETAILED ACTION

Allowable Subject Matter

1. Claims 4-10, 14-20, 24 and 25 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 11-13, 21-23 and 26-28 rejected under 35 U.S.C. 103(a) as being unpatentable over Yaegashi (JP 2002026335) in view of Fujikawa (6,414,738).

Regarding Claims 1-3, 11-13, 21-23 and 26-28. Yaegashi discloses a thin film transistor and method of manufacturing the same where in Fig. 6, either the source or the gate electrode is composed of a layered structure composed of an Aluminum film 33a, an oxygen containing Aluminum film 33b that functions as a diffusion preventing layer and a Titanium film 33c. Yaegashi fails to disclose the required diffusion preventing film. However, Fujikawa discloses a display structure where in Fig. 5, diffusion preventing/barrier film of titanium nitride is disposed between aluminum-based electrode 8 and the titanium based electrode 13.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required diffusion preventing/barrier film/layer in

Art Unit: 2826

Yaegashi as taught by Fujikawa, in order to have a liquid crystal display device with increased performance.
